# Beyond traditional Pentest

Extreme hacking proficiency

Strike collaborates with the world's top ethical hackers. You will always be assigned the specialist hacker in your technologies to uncover the vulnerabilities that truly matter to you.

Innovative Platform

Gain absolute visibility into the pentesting exercise. Through our platform, you can view the work log of the ethical hacker and receive real-time notifications of the vulnerabilities discovered.

Strategic Partner

Customer service ready to assist you at all times. Our strategy team will help you outline the initial objectives of the pentest and provide weekly recommendations for achieving better results.

Ready for the Pentest you need

At Strike, our team of experts is fully prepared to conduct various types of pentests to ensure your cybersecurity is as strong as it can be.

Web-app Testing
Ability to uncover critical vulnerabilities in an average of 6 hours.

Mobile App Testing
Both on Android and iOS, and even if they have geographic restrictions.

API Testing
Strikers capable of discovering highly creative vulnerabilities - with or without documentation - in any API.

Cloud Testing
Strikers specialized in all web service providers such as AWS, Azure, and Google Cloud.

Infrastructure Testing
Work with ethical hackers specialized in any on-premise infrastructure.

Internal Testing
At specific locations, we have ethical hackers capable of testing your internal infrastructure.

Discover the most innovative pentesting platform in the market

Adjust your pentest with agility. Use Strike's self-service platform to act on your vulnerabilities as soon as they are reported, and seamlessly modify the scope of your pentest on the fly.

Dashboard
Centralize all your vulnerabilities in one place and get suggestions on how to resolve each case.

Solutions
Receive clear actionables for each found vulnerability, along with suggestions on how to resolve them.

Reports
Your PDF report is generated automatically, allowing you to download it and it will always be up-to-date.

Retest
Conduct a retest of the reported vulnerabilities. We provide support for mitigating them.

Integrations
Communication and visibility of vulnerabilities through Jira and Slack.

Tailored service to fit your needs

You will have a Support Team and a Strategic Team to ensure your pentesting experience meets your expectations. The Support Team will be available to assist you at all times, while the Strategic Team will follow up on your project to identify improvement opportunities.

1 **2** **3**

Goal Definition

In a joint meeting, the Strategic Team will seek to understand your needs in order to plan a customized pentest for your case.

Smart Assignment

You will be semi-automatically assigned the ideal ethical hacker for you. The hacker will be an expert in the technologies you use and need to test.

Continuous Assistance

You can have weekly meetings with the Strategic Team to adjust your pentest on the fly. Additionally, the Support Team will always be available to streamline your processes.

Strike's Promise

Not just words. For us, the quality of the pentest is non-negotiable.

Get 50% of your money back if our ethical hackers don't find medium, high, or critical vulnerabilities in the first 90 hours of pentesting.

What our customers say

"Partnering with Strike helped to strengthen our security posture and offensive security capabilities. Working together in a close, ongoing way allows us to continuously find and fix vulnerabilities and constantly improve. The cost and ROI were highly beneficial for us."

okta

David Telehowski
Senior Director, Security Engineering

"For us at Pier, security is the most important aspect, not only on the surface but throughout our entire product. When we reached out to Strike, we were looking for someone that could test & find vulnerabilities across our entire stack. We are very happy that we have found the right partner to achieve that, and we are looking forward to continuing this important work together."
